

# ID75 Rev Hotswap VIA Manuals

(Prompt Technical Support: [ymdkey.com](http://ymdkey.com))

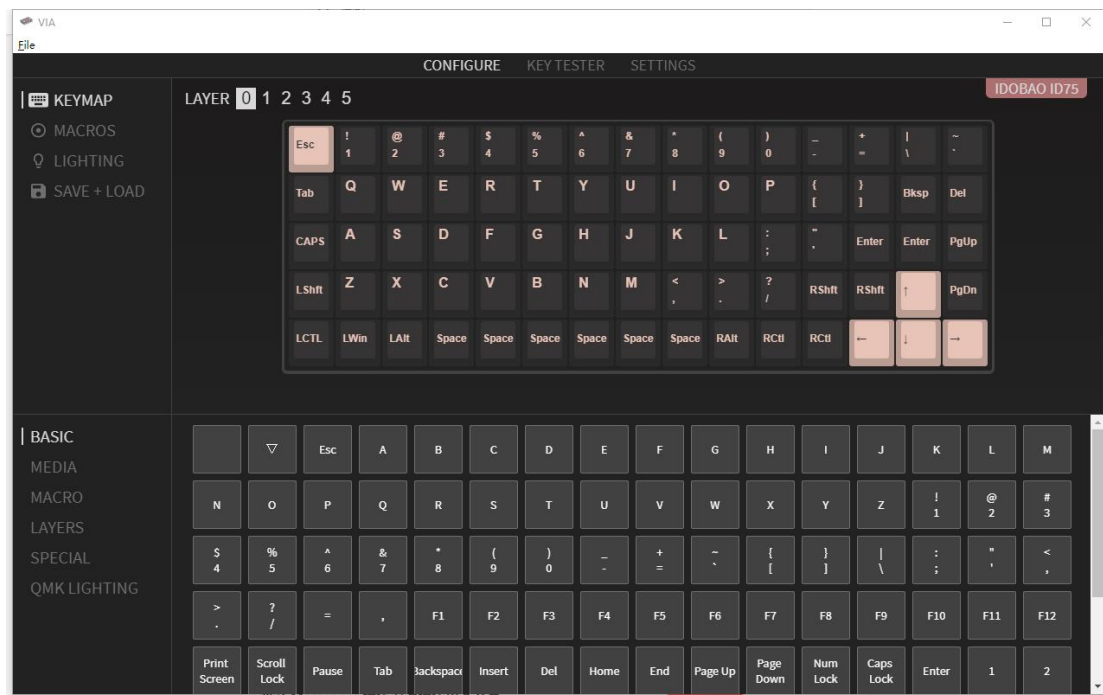

## QUICK START HOW TO PROGRAM

1. Download VIA software here ( Windows and Mac choose different file,window choose exe file,Mac choose dmg file)

<http://github.com/the-via/releases/releases/tag/v1.3.1>

2. Double Click VIA.EXE to open it

3. There will be layout page shown up.Just click the key you want to change and choose the new keycode as your request is ok.

4. If you don' t quite know about the keycode.Please refer to below link

[https://github.com/qmk/qmk\\_firmware/blob/master/docs/keycodes.md](https://github.com/qmk/qmk_firmware/blob/master/docs/keycodes.md)

## HOW TO FIX IF FLASHING WRONG FILE

If you program other files by mistake and can' t get it to work.You can open the back of PCB,then click the reset button twice to get the PCB flash memory card out,then drag the original hex file inside is ok.Or set a reset keycode to your keyboard from VIA and click this key directly on keyboard.

Original file can be downloaded here
